SUMMARY

Aspiring Data Science professional pursuing an M.Sc. in Artificial Intelligence & Data Science with knowledge of Python, SQL, Data Analysis, Machine Learning, and Data Visualization. Gained practical experience through Python development and web-based projects, including API integration and data scraping. Seeking an opportunity to apply technical skills, develop industry experience, and contribute to data-driven solutions.

EDUCATION

Karunya Institute of Technology and Sciences, Coimbatore
M.Sc. Artificial Intelligence & Data Science | 2025–2027
CGPA: 8.65 / 10

Bishop Heber College, Tiruchirappalli
B.Com. Business Analytics | 2023–2025
CGPA: 7.0 / 10

Rasi Matric Higher Secondary School, Salem
Higher Secondary Education (12th)-89%

WORK EXPERIENCE / INTERNSHIP

Python Development Intern (TecnolynxGlobal Private Limited | Jun 2026)

During my Python Development Internship at TecnolynxGlobal Private Limited, I developed a keyword-based web data scraper and insight generator using React.js and Django REST Framework. I gained practical experience in Python development, API integration, debugging, and data processing. I also strengthened my problem-solving and collaborative software development skills

TECHNICAL SKILLS

- **Machine Learning & AI:**
  Machine Learning, Artificial Intelligence, Data Preprocessing, Predictive Analytics
- **Programming Languages:**
  Python, SQL
- **Data Science & Analytics:**
  Data Analysis, Exploratory Data Analysis, Statistical Analysis
- **Data Visualization:**
  Power BI, Tableau, Matplotlib
- **Databases:**
  SQL, Database Management
- **Tools & Technologies:**
  Jupyter Notebook, Mysql, Microsoft Excel
- **Soft Skills:**
  Problem Solving, Analytical Thinking, Time Management, Willingness to Learn, Team Collaboration

PROJECTS

Keyword-Based Web Data Scraper and Insight Generator

Tech Stack: Python, Django REST Framework, React.js, API Integration

- Developed a web-based application to scrape and collect relevant data based on user-provided keywords.
- Built backend APIs using **Django REST Framework** and integrated them with the React.js frontend.

Fish Tank Monitoring System

Tech Stack: IoT, Sensors, Python, Data Analysis

- Developed an IoT-based system for monitoring fish tank conditions.
- Collected sensor data and used monitoring techniques to track tank conditions.
- Designed the system to support real-time observation and improve fish tank management.

Search Engine Using Data Warehousing

Tech Stack: Python, Data Warehousing, ETL, Data Analysis

- Developed a search-oriented system using data warehousing concepts.
- Applied ETL processes for data extraction, transformation, and loading.
- Organized and processed data to support efficient search and analysis.

CERTIFICATIONS

Python Development / Python Training
WITSPIRE SOLUTION

- Completed hands-on training in Python, covering data structures, functions, and object-oriented programming.
- Developed problem-solving skills through practical programming tasks and basic application development.

Zoho Training Course
ZOHO

- Gained practical experience in building low-code applications using Zoho Creator.
- Learned form creation, workflow automation, Deluge scripting, and cloud-based business solutions.

AI Conference / Certificate
AI International Conference – Certificate

- Participated in an international conference focused on Artificial Intelligence.
- Gained exposure to current AI concepts, applications, and emerging technologies
